Work Experience

Software Engineer – Mobile Applications | TECHNOVATE , Kolkata / Bhubaneswar

Duration: Jan 2026 to Present
Responsibilities:

- Developed a specialized healthcare mobile application for children with autism, incorporating interactive therapy workflows, daily progress tracking, and clinical communication.
- Engineered cross-platform mobile solutions for MAGAS (#ServiceMedia), a dedicated B2B lead generation and service delivery platform empowering entrepreneurs, startups, and SMEs.
- Designed and built an end-to-end property marketplace mobile app enabling users to search, buy, sell, and list properties with dynamic filters and location-based discovery.
- Developed interactive sports training and tracking mobile applications for boxing and baseball athletes, integrating workout routines and real-time performance metrics.
- Implemented Hospital Management System (HMS) mobile application workflows, automating patient appointment scheduling, digital health records, and clinical management.
- Configured and managed end-to-end deployment pipelines on Google Play Console and Apple App Store, ensuring compliance with app review guidelines.

Software Engineering Specialist | MOHS10 TECHNOLOGIES , Bhubaneswar

Duration: Mar 2024 to Nov 2025
Responsibilities:

- Designed a B2B application responsible for managing business-to-business transactions and interactions between buyers and sellers.
- Worked closely with the team to integrate frontend and backend systems, ensuring a cohesive and user-friendly experience for users.
- Implemented payment gateway integration to enable secure online transactions, ensuring compliance with industry standards and regulations.
- Utilized Thymeleaf engine in Flutter based applications, enhancing dynamic content generation and user experience.
- Implemented role-based access controls to ensure data privacy and security.
- Participated in monthly meetings, providing updates on ongoing projects.
- Promoted to Software Engineer Specialist for exceptional performance and dedication.
